國立中央大學九十四學年度碩士班考試入學試題卷

共一頁第一頁

所別: 學習與教學研究所碩士班 科目: 心理與教育研究法

- 一、假設你想瞭解「優良教師」的人格特質,你會:
 - 1. 運用哪一種研究方法來研究?請說明其理由。(9分)
 - 2. 運用該研究法可能產生的缺點爲何?請說明之。(8分)
 - 3. 你要採取哪些措施以避免第二小題所陳述的缺點?請說明之。(8分) (本題需依序作答)。(共25分)
- 二、請針對下列的<u>量表類型</u>,選擇適當的信度考驗方法,並說明選擇該考驗方法的原因。(共 25 分)
 - 1. 有 30 個題項 (items) 的「李克特氏量表」(Likert Scale)。(8 分)
 - 2. 有150個題項的「李克特氏量表」。(8分)
 - 3. 有 30 個題項的「二分法的量表」(如調查在求學時期,是否有各種突破困境的經驗)。(9分)
- 三、Please prove the following claims or give a counter example for each claim. (25 分)
 - 1. When the value of the correlation coefficient is large, the relation between the two variates is close to linear, thus, when r = 0.9 or 0.95 the relation is nearly linear. (8 %)
 - 2. When the value of the correlation coefficient is zero or near zero the two variates have no or almost no functional relation. (7分)
 - 3. When the value of the correlation coefficient is positive (negative), the value of Y becomes larger (smaller) as a whole, as the value of X becomes larger (smaller). (5分)
 - 4. Given three variates X_1 , X_2 , and X_3 . The partial correlation $r_{12,3}$ is always large than or equal to part correlation $r_{1(2,3)}$. (5 \mathcal{H})
- 四、Please fill in each blank with the right answer. (25 分)

 H_0 : $\mu_1 = \mu_2 = \mu_3 = \mu_4$

H_i: (_____) (2 分)

 $F_{0.95} = 2.95$, n1 = n2 = n3 = n4 = 8

SV	SS	Df	MS	F	P
Between	()(2分)	()(3分)	34	() (3 分)	() .05 (3 分)
Within	392	()(3分)	()(3分)		
Total	()(3分)	()(3分)
